

Audio-Video and Lighting plants

MC SOLUTIONS has managed important commissions through the years to realize Audio-Video and Lighting plants, from the project to the installation process according to customers' needs, taking advantage of world's best quality devices for Audio-Video and Light reproduction signals.

The plants have been designed and installed among structures that hold shows of international impact, such as at the F1 Monza National Racing Circuit and at Premier League stadium in occasion of sporting events.

Design and realization of video systems

MC SOLUTIONS, that is specialized in high definition Video broadcast by means of copper or optic transmission, is able to supply and implement LED WALL and WALL MONITOR fulfilling customers' requirements, offering the interactive function to completion of a state-of-the-art system.

The customer has the option to remote control the broadcast of video contents: videos, tweets from the audience, information about the show or about the sporting event and advertisements.

The offered devices can be supplied for indoor installations or for outdoor implementations, compliant with IP65 standards.

Design and realization of audio systems

Entertain and excite the audience with high quality sound is MC S.' mission and in order to achieve this goal MC SOLUTIONS offers a 360° service and a long-time experience in audio transmissions. The sound is brought directly to each spectator's heart in many different contexts, from private concerts to international sporting events, thanks to the accurate devices' selection and to the mastery in broadcasting.

MC SOLUTIONS installs EVAC plants (CEI EN-60849) designing them from the very beginning, or upgrading the existing ones, in order to grant audience safety in case of emergency (fire, earthquake, etc.).

MC SOLUTIONS assist the customer in projecting and in installing the graphic interface to manage Audio and customized messaging.
